**(54) HAIR REMOVING
DEVICE**

(57) Abstract:

PURPOSE: To provide a hair removing device, which can pull out the hair with the sufficient pinching force.

CONSTITUTION: This device is provided with a rotating member 3, which is formed in the end of a main body 1 and which is rotated around a shaft, a hair removing claw 4 having pinching parts 44, which are rotated by the rotating member 3 and which are opened and closed in the axial direction, and abutment parts, which are extended from the ends of the pinching parts 44, and cam members 24, 25 for pushing the hair removing claw 4 in the axial direction so as to open and close the pinching parts 44 in response to the rotating position of the hair removing claw 4. In this device, the hair removing claw 4 is formed so that the parts to be pushed by the cam members 24, 25 and the pinching parts 44 are positioned on the nearly straight line.
